Daan Mogot, Jakarta Barat

Data Science student with a deep interest in Machine Learning and data visualization to generate meaningful insights. Developed a nutritional status prediction project using Machine Learning and created interactive, informative education data visualizations. Active as a public speaker and moderator with strong analytical thinking, problem-solving skills, and a positive, energetic approach.

Work Experiences

Maju Terus Maju - Jakarta Barat

Jun 2024 - Aug 2024

Data Analyst

Maju Terus Maju is a company engaged in the sales and distribution of receipt paper for various business needs. The company continuously optimizes sales and operational data management to improve efficiency, understand market trends, and support more accurate decision-making.

- Collected and cleaned over 2,000 transaction records using Microsoft Excel, ensuring high data accuracy and consistency in sales reports.
- Analyzed sales trends by product category and time period to identify efficiency opportunities and potential revenue growth.
- Developed interactive visualizations in Tableau to monitor weekly sales performance, improving management decision-making speed by 35%.
- Built automated dashboards integrating sales, inventory, and delivery data in real time, enabling the operations team to detect customer demand trends faster.

Education

Universitas Bina Nusantara - Jakarta, Indonesia

Jul 2023 - May 2027

Bachelor Data Science, 3.87/4.00

- Selected for the Student Creativity Program (PKM) with a Nutritional Status Prediction Project, achieving high model accuracy and innovative data analysis.
- Led the PAUD Teaching Project, coordinating a team in interactive learning activities for kindergarten students while strengthening communication and teamwork skills.
- Completed a Data Science Short Course focused on Data Visualization using Excel and Tableau, and Machine Learning for data driven prediction and analysis.
- Finished the Fundamentals of Deep Learning training by NVIDIA, learning core neural network concepts, model optimization, and real-world applications.

Organization Experience

Data Science Club - Jakarta

Jan 2025 - Present

PIC Event Organizer

- PIC Event Organizer that leads for WDB, Smash N Fest, and DSC Kind, coordinating a team in executing three major community events.
- Moderator for Welcoming Party and LDKA, facilitating discussions and ensuring active, engaging interactions among participants.
- Treasurer for LDKCP, managing event budgets and financial reporting with transparency and efficiency.
- Event Division Staff for Outventure and DSC Seminar, supporting event planning and on site execution.

Kemampuan, Penghargaan, dan Kompetisi

- **Research Project On Nutritional Status Prediction**  (2024): Data Collection, Data Cleaning, Data Preprocessing, Data Analysis, Statistical Evaluation, Insight Generation, Dashboard Building, Data Visualization, Python, Analytical Thinking.
- **Education Insight & Storytelling Dashboard using R Shiny**  (2024): Data Cleaning, Data Processing, Exploratory Data Analysis, R, Shiny, tidyverse, Visualization, Insight Analysis, Data Storytelling, Interactive Dashboard, Data Communication, Analytical Thinking.
- **Correlation and Pattern Visualization on Iris Dataset using R**  (2024): Data Cleaning, Exploratory Data Analysis, Correlation Analysis, R, ggplot2, Visualization, Insight Interpretation, Pattern Recognition, Data Storytelling, Analytical Thinking.
- **Data Science Foundation Udemmy Learning**  (2023): Tableau, Power BI, Shiny, R, Python, SQL, Database, Data Storytelling, Data Visualization, Data Collection, CRISP DM, Statistic, Supervised & Unsupervised Learning, Plotly, Shell Scripting
- **Moderator For LDKA , Welcoming Party, & DSC Cascade**  (2025): Public Speaking, Confident, Entertaining, Energetic, Fiery Spirit, Active, Critical Thinking
- **Event & Games Creator**  (2025): Creative, Critical Thinking, Problem, Workflow Management, Decision Making, Adaptability
